INDEX

A

Acanthocybium, 317, 319
Acanthopterygii, 231
  branchiostegals of, 231
  opercular elements of, 426
  parallelism with Microcyprini, 219
  protrusility in, 424, Fig. 116
  Smith Woodward on, 301
  vertebral column of, 301
Acanthurids, 279 *et seq.*
  eyes in, 439
Acanthurus, 281
Acentrophorus, Figs. 21, 287
Aceratias
  description of, 407
  stage in evolution of Aceratiidæ, 410
Aceratiidæ
  Parr on, 407
  specializations of, 407
  three stages in evolution of, 410
Acipenser, Figs. 19, 20. See also Chondrostei.
Actinopterygii
  contrast with shark, 116
  opercular elements of, 425
  primitive, 116
Adaptation
  paradoxes of, 446, 447
Adaptive radiation
  of jaws and teeth in percomorphs, Fig. 291
  of mouth, 415
  of premaxilla and maxilla, Fig. 283
Adioryx, 237
Adipose fin
  Garstang on, 193
Adnasal
  in *Distichodus*, 183
Agonidæ
  relations with Platycephalidæ, 330
Aipichthys, 207
  as ancestor of carangoids, 300
  vertebræ of, 301
Air-bladder
  Garstang on, 173
  of Heteromi, 200
  of *Holocentrus*, 237
  homology of diverticula of, 155
  of *Hyodon*, 168
  independent origins of, 174
  of nematognaths, 196
  of *Notopterus*, 169
  of Ostariophysi, 181
  relation to Weberian ossicles, 181
  of typical nematognath, Fig. 78
Alabes, Fig. 232
  characters of, 352
Albula, 203, Fig. 37
Albulidæ
  as allies of mormyroids, 173
  dentition of, 423
  relationships of, 144, 166
Aldrovandia, Fig. 295
Alepidosaurus, 201
Alepisaurus
  teeth of, 204
Alepocephalus, Fig. 51
  epibranchial organ in, 179
  supramaxillaries in, 157
Aleutera, Figs. 163, 165
  erectile spine of, 285
  skull of, 284
  specializations in, 295
  suspensorium in, Fig. 290
Allis, Edward Phelps
  on *Amia*, 108, 134, 425
  on branchial arches, 81
  on branchial muscles, 425
  on *Dactylopterus*, 343
  on *Esox*, 216
  on hyomandibular of teleostomes, 81
  on intermaxillary tissue, 267
  on interopercular, 425
  on morphology of teleost skulls, 412
  on *Polypterus*, 108, 110, 111
  on premaxillæ, 96
  on primitive shark, 82, 101
  on *Scomber*, 309
  on Scorpænoidei, 322
  on *Sebastes*, 325
Allotriognathi, 295–300
Ambassidæ, 264
Amblyopsis, 219
Amblyopsoidea, 214, 219
Ambystoma
  experiments on eye of, 454
  nasal capsules of, 454
Amia, 133, 134, Figs. 23, 28, 283
  Allis on, 108, 134, 425
  branchial muscles of, 425
  comparison with *Polypterus*, 108
  maxilla of, 242
  premaxillæ and maxillæ of, Fig. 283
  resemblance to characins, 183
Amioidei, 131
  Weberian apparatus lacking in, 183
Amiurus
  chondrocranium of, 196
Ammodytes, 201, Fig. 234
  otoliths of, 355
Ammodytoidei, 354
Amphioxus
  as degraded cyclostome, 99
Amphipnous, 350
Amphisile, 226, Fig. 109
Anabantoidea, 269
Anabas, Figs. 145, 146
Anableps, Fig. 98
  otolith of, 321
  skull of, 220
Anacanthini, 359
  Regan on, 380
Anacanthus, Figs. 164, 165
  specializations in, 286, 295
Anarhichas, Figs. 254, 255
  skull of, 376
  teeth of, 423
Angel-fish, see Chætodontoidea
Angelichthys, Fig. 153
  skull of, 278
Anglers, see Pediculati
Anguilla, Fig. 82
Anlagen, 445, 449
Antennariidæ, 389
  differences among, 394
  pectoral pterygials of, 387
Antennarius, Figs. 265, 266, 288
  Cuvier on, 387
  illicium of, 389, 394, 403
  mouth region in, Fig. 288
  neurocranium of, 392
  opercular of, 401
  skull of, 389, 390, 391
Antigonia, Fig. 149
  skull of, 273
Aploactis, Fig. 208
  compared with *Patæcus*, 330
Aplodinotus
  otolith of, 253
Apodes, 202
  derivation of, 203
  otoliths of, 203
Apogon
  otoliths of, 233
Apogonidæ, 247
Arapaima, Fig. 59
  articulation of parasphenoid, 164
  differential growth rates of, 434
  scale bone of, 165
  teeth on parasphenoid, 166
Archosargus, Figs. 123, 291
  adjustments for balance, 441
  jaws and teeth of, 453, Fig. 291
  skull of, 249
Arcturus expedition
  studies on body-form, 432
  studies of larval fishes, 428
Argentina
  otolith of, 163
Argyropelecus, Fig. 52
  mouth of, 416
Arius, Fig. 79

Artediellus
preopercular spikes of, 332
Aspicottus, Fig. 216
skull of, 339
Aspius
modifications of jaws, 193
Astronesthes
skull of, 157, 158
Astroscopus, Figs. 247, 248
eyes in, 439
skull of, 367
sources of specializations in, 365
Atelaxia, 299
Atherinidæ, 261, 264
skull of, 264
Atherinopsis, Fig. 143
Auditory cæcum, 169
Auditory capsules, 440
Auditory fenestra, 168
Aulopidæ
Regan on, 380
Aulopus, Figs. 85, 283
otolith of, 212
premaxilla and maxilla of, Fig. 283
skull of, 380
Aulorhynchus, Fig. 301
Aulostomus, Fig. 104
Auxis, 319, Fig. 190
Ayers, Howard
on jaws of gnathostomes, 80, 99

B

Balistes, Figs. 161, 162, 165
specializations in, 295
Balistoidei, Figs. 165, 290
classification of, 279, 281
comparative series of skulls of, Fig. 165
eyes in, 439
neurocranium of, 438
skull of, 284
suspensorium in, Fig. 290
Baphetes, Fig. 9
Barilius
otoliths of, 193, 220
Barracuda, see Sphyrænidæ
Basibranchial teeth
of *Gonorhynchus*, 177
"Basic patents," 181, 448
Basilichthys, Fig. 139
Basipterygoid processes, 164
Basking-shark, see *Cetorhinus*
Basses, see Serranidæ
Bathymaster
compared with *Trichodon*, 371
skull of, 358
Bathyrissa, 144
Bathysudis, 207
Batrachididæ, 372
Batrachoidea, 387
mouth of, 416
Beebe, William
collection of ceratioids, 402, 404
on illicium of *Rhynchoceratias*, 408
laboratory at Bermuda, 428
on olfactory sacs of *Haplophryne*, 407
on *Remora*, 320
Belone, 229
Belonesox, Figs. 96, 97
skull of, 218
Benninghoff, A.
cited by Noble, 454
Berycoidei, 233
otoliths of, 237, 253, 273
skull of, 234
Bigelow and Welsh
on larval stages of teleosts, 445
on puffers, 288
on *Sebastes*, 325, Fig. 204
Blennies, see Blennioidei
Blennioidei, 374
derivation of Opisthomi from, 354
Blennius, Fig. 252
dentition of, 424
skull of, 374
Boar-fish, see Zeoidei
Bones
power of growth or reduction in, 386
Bonito, see Scombroidei
Borophryne, 403
Boulenger, G. A.
on Acanthuridæ, 279
on *Amphipnous*, 350
on Chætodontoidea, 274
on *Cheilodactylus*, 260
on Cirrhitidæ, 259
on cranial osteology of fishes, 412
on Cyclopteridæ, 339
on Gadidæ, 380
on *Gerres*, 253
on Haplomi, 214
on Labyrinthici, 269
on *Leiognathus*, 254
on *Lipogenys*, 201
on Mormyridæ, 173
on notopterids, 174
on Opisthomi, 354
on Percesoces, 223
on Platycephalidæ, 330
on *Rachycentron*, 304
on "Scombriformes," 300
on synentognaths, 223
on vertebræ of acanthopts, 301
Bovichthys, Fig. 240
skull of, 358
Brama, Fig. 182
comparison with *Coryphæna*, 306
comparison with *Psettus*, 275
relation to *Mene*, 306
Branchial arches
connection with neurocranium, 439
description of, 412
figured by Allis, 425
forms of, 81
homologies of, 80
muscles of, 425
origin of, 84
relation to gills, 424
Branchial basket, 77
Branchiocranium, see also Skull, Syncranium
bones of, 75, 89, 90, 412
differentiated from neurocranium, 77
form and evolution of, 412
functions of, 443
Branchionichthys, 394, Fig. 264
Branchiostegal rays
in Acanthopterygii, 231
in Haplomi and Iniomi, 214
in Isospondyli, 135
in Microcyprini, 219
in Ostariophysi, 182
in Salmopercæ, 232
in Synentognathi, 224
in typical percomorph, 86
variability in number of, 182, 427
Breder, C. M.
feeding habits of *Pterois*, 329
Bregmaceros, Fig. 261
Brevoortia, 424
Bridge, T. W.
cited by Watson, 123
on teeth of *Osteoglossum*, 166
Broili, Ferdinand
on *Gemündina*, 101
Brotulidæ, 379
Brycon, Fig. 70
Bryant, W. L., 107, 108
Burr, cited by Noble, 454
Butterfly fishes, see Chætodontoidea

C

Cæsioperca, 247
Calamus, Fig. 122
Callionymidæ, 373
Callionymus, Fig. 242
mesethmoid of, 440
preopercular of, 427
preopercular spikes of, 332
relationships of, 363
skull of, 361
specializations in, 361
Caproidæ
grouped with Zeidæ, 271
resemblances to *Scorpis*, 275
Capros, Fig. 149
skull of, 272
Caracanthus, 339, 341
Carangidæ
affinity with primitive percomorph type, 302
compared with Scombridæ, 300, 304
derivations of, 300
relation to stromateoids, 306
resemblance of *Leiognathus* to, 254
skull characters of, 302
taxonomic relations of, 300
vertebræ of, 301
Carpiodes, Fig. 76
Carps, see Eventognathi
Catfishes, see Nematognathi
Catostomus, 189, 190
Caularchus, 372

Centriscus, Fig. 108
possible derivation of, 226
Centropomus, Fig. 294
otolith of, 271, 277, 345
Cephalacanthus, Fig. 222
Cephalaspids, 99, Fig. 2
Cephalic shield
in *Bothriolepis*, 100
in catfishes, 196, 441, Fig. 80
in *Dactylopterus*, 441, Fig. 223
in gurnards, 441, Figs. 218–220
in Nematognathi, 195
in siluroids, 441, Fig. 80
Cepola
otolith of, 353
Ceratioids
Antennarius-like features of, 402, 403
description of, 401
divergent evolution in, Fig. 277
mouth of, 416
pectoral fins of, 387
Ceratoscopelus
otolith of, 212
Cetomimidæ, 209, 211
Cetomimus, Fig. 92
type ancestral to Lyomeri, 213
Cetorhinus, 424
Chænichthyidæ, 360
Chætodipterus, Fig. 152
adjustments for balance, 441
skull of, 278
Chætodon, Figs. 155, 291
dentition of, 424
skull of, 279
Chætodontoidea, 274
dentition of, 424, Fig. 291
relation to Plectognathi, 279
relation to *Zeus*, 271
resemblance of *Antigonia* to, 273
Chanos, Figs. 44, 48
scale bone of, 165
skull characters of, 151, 152
subtemporal bone of, 154
Characodon, 220
Characins, see Heterognathi
Charitosomus, 175
resemblance to *Gonorhynchus*, 179
Chatoessus, Fig. 39
skull of, 146
Chauliodontidæ, 160
Chauliodus, Fig. 55
dentition of, 424
mouth of, 416
quadrate-articular joint in, 158, 159
Chaunax, Fig. 271
intermediate between sea-bats and *Antennarius* type, 401
Cheilinus
otolith of, 379
relation to *Epibulus*, 257
Cheilodactylus, Fig. 136
skull of, 260
Cheilodipteridæ, 264
Cheirodus, Fig. 15
Cheirolepis, Figs. 8, 12, 283, 286
mouth of, 416
premaxillæ and maxillæ of, Fig. 283
suspensorium of, 421
Chiasmodon, Fig. 137
mouth of, 416
Chiasmodonts, 260
Cheilobranchus, 352, Fig. 232
Chimæra, 84
Chimæroids, 103
opercular elements of, 425
Chirocentrids, 142
Chirocentrus, 144, Figs. 34, 288
dentition of, 142
mouth region in, Fig. 288
Chirolophius, 387
Chironectes, Fig. 264
characters of, 388
Cuvier on, 387
Chironemus
otoliths of, 260
Chirostoma, Fig. 140
appearance of, 264
Chlamydoselachus, Figs. 4, 6, 13, 14
branchial muscles of, 425
musculature of head, Fig. 6
origin of opercular fold in, 84
skull and visceral arches of, Fig. 4
Chlorophthalmus, 207, 209, 211
Chondrocranium
of *Amiurus*, 196
of larval *Gymnarchus*, 173
Chondrostei, 117
mouth in, 416
neurocranium in, 438
opercular elements in, 426
Chondrosteus, Fig. 19
Chordates, 101
Chorinemus, see *Scomberoides*
Chromis
otolith of, 256, 321
Chrysichthys, Fig. 77
Cichlids, 237
dentition of, 424
skull of, 254
Circumorbital pattern of skull, 125
in Protospondyli, 428
Cirrhitidæ, 259
Cirrhitus, Fig. 135
skull of, 259
suborbital in, 325
Cladoselache, Fig. 5
reduction of exoskeleton in, 100
Clarias, Fig. 78
Cleland, John
on *Mola*, 294
Cling-fishes, see Xenopterygii
Clinus, Figs. 251, 254
skull of, 374
Clupea, Figs. 38, 283
swim-bladder in, 174
Clupeioidea
dentition of, 424
diverticula of swim-bladder in, 147, 439
skull of, 137
Coccocephalus, Figs. 12, 283, 286
Cockerell, T. D. A.
on Brotulidæ, 379
Coelacanths
Watson and Stensio on, 270
Coilia, Fig. 41
Cole and Johnstone
on the preopercular, 427
Compensatory growth, 386
Convergence
between cephalic shields of catfishes and ostracoderms, 196
between gadoids and ophidiids, 380
between Opisthomi and *Protopterus*, 353
between skulls of *Electrophorus* and *Symbranchus*, 352
Copelandellus, Fig. 301
Coregonus, 179
Coridæ, 257
Coryphæna, Fig. 183
dorsal fin of, 391
relationships of, 302, 305
skull of, 305
comparison with *Psettus*, 275
Coryphænoides, Fig. 262
Cottidæ
relationships of, 321, 330, 339
skull characters of, 332
skull ridges, 341
Cottoperca, Figs. 237, 239, 240, 241
opercular region of, 360
pectoral girdle of, 357
Pinguipes compared with, 356
skull of, 358–360
Cottus, Figs. 212, 221
head of, 388
Cranial foramen
in *Mormyrops*, 171
in *Notopterus*, 169
Cranial vault
architecture of, 436, 437
bracing of, 437
influence of auditory capsules on, 440
triradiate sutures of, 437, 438, Fig. 299
Crapatulus, Fig. 244
pectoral girdle of, 365, 370
skull of, 365
Crevalles, 300
Cromeria, 155, Fig. 49
Crossopterygii
opercular elements of, 425
typical skull patterns of, 105
Crucifix fish, Fig. 79
Cryptosparas, 403, Fig. 273
Ctenothrissa, Fig. 42
description of, 151
pelvic fins of, 149, 150
Ctenothrissidæ, 145
Cutlass-fishes, see Trichiuridæ
Cuvier, Georges
on *Chironectes*, 387, 388
Cybiidæ, 315
Cybium, 317, 319
Cycleptus, Fig. 300
head of, 453

Cyclopteridæ, 339
Cyclopterus, Fig. 217
Cyclostomes, Figs. 2, 3
  branchial basket of, 77
  origin from ostracoderms, 76
  skull of, 99
Cyclothone, Fig. 54
  eyes in, 439
  jaws in, 159
  mouth in, 416
  not ancestral to Lyomeri, 213
  suspensorium in, 158
Cynoscion
  otoliths of, 253
Cyprinoidea
  ancestral type of, 216
  branchiostegal rays in, 182
  interparietal fontanelle of, 193
  mouth of, 416
  neurocranium of, 439
  otoliths of, 181, 182, 193, 194
  pharyngeal teeth of, 193
  primitive type of, 193
  resemblance to *Anabas*, 271
  resemblance to synentognaths, 223
  Starks on, 214
Cyprinus, Fig. 74

D

Dactylagnus, Fig. 244
  skull of, 363
Dactylopterus, Figs. 222, 223
  cranial buckler in, 441
  pectoral girdle of, 343
  preopercular in, 427
  skull of, 343
Dactyloscopidæ, 363
Dallia, Fig. 95
  skull of, 216
Dapedius, Figs. 22, 283
